From: Maureen Barr <m.barr@trileaf.com>

To: Group R5Foia/R5/USEPA/US@EPA,

Good Morning,

I am looking for records relating to an incident that appears in the emergency response notification system. The incident occurred on October 1, 1994, and involved the release of Toluene. It was reported by a caller stating that over 1200 gallons were spilled by the company BASF Corp located on Old Rd 30 West in Warsaw, Indiana. Are there any available reports on cleanup efforts or results of investigations that show the extent of the spill? The database report says that the soil was contaminated and that groundwater was reached.

Thank you for your help, please let me know if you further information.

Respectfully,

Maureen Barr
